ABOUT ME

Java & JavaScript Developer with several technical skills that have been acquired studying self-taught who considers constant formation as something important either becoming more familiar with technologies already known or learning new ones that are necessary. All this to deliver outstanding quality work and be prepared at all times for any need. I began my journey with Java and Spring Boot a few months ago and am now expanding my knowledge to include microservices,

TECHNICAL AND SOFT SKILLS

Languages: HTML, CSS, JavaScript (ES6), Java and SQL.

Libraries, frameworks and tools: React, Spring Boot, Hibernate, JWT, MySQL, Docker, Git, GitHub, and Terminal.

Soft skills: Responsibility, honesty, punctuality, organization, teamwork and continuous learning.

EXPERIENCE

JavaScript Coach *Laboratoria* | July 2022 - March 2024

I accompanied the bootcamp students in their web development learning: Facilitated individual and group sessions to resolve doubts, conducted workshops mainly in JavaScript, and provided feedback on completed projects.

Collaborated with international teams using SCRUM methodology: Made data-driven decisions to enhance the bootcamp experience, working with people from different countries.

Feedback played an important role in my day-to-day work: I valued feedback highly and actively sought it from both students and colleagues, understanding that it would aid in my professional growth and enhance my daily performance. I also provided feedback to others to help them benefit from similar growth opportunities)

(Some of my personal projects that I have developed)

Audiophile E-commerce to buy audio items such as headphones and speakers. The site consumes a JSON that includes all the information about each product. (HTML, CSS, JavaScript, TypeScript, React, SASS/SCSS)

CountriesApp Application that consumes an API to obtain information of countries such as population, currency, neighboring countries, etc. It includes a searchbar and a theme changer. (HTML, CSS, JavaScript, React, Context API, SASS/SCSS)

(Additional projects, detailed descriptions, and links to repositories and live demos are available in the portfolio)
